Hardy English Chrysanthemums

We have a limited number of plants of these new Hardy English Chrysanthemums . . . varieties that were recently imported and which have grown in our trial garden for one year. The English originations are characterized by their winter-hardiness, by their strong growth and luxurious deep green foliage, and by the very lovely decorative flowers. The flowers are large, the stems long, therefore are superb for cutting.

Your choice: Each 75c; 3 for \$2.00; 12 for \$7.00

BRONZE FREDA. A gorgeous bronze-salmon with quilled petals. Comes into flower very early and has a long blooming season. September.

CERISE. Beautiful rose cerise with quilled petals. Flowers are in sprays on tall, wiry stems. Fine for decorating. September.

CONQUEROR. A lovely deep rich crimson variety. Excellent when disbudded or when allowed to grow in sprays. September blooming.

COPPELIA. A new shade of Indian red. The flowers are produced in sprays upon stiff stems. September.

GOLD STANDARD. Very early deep yellow. Will grow to be 6 inches in diameter if disbudded. September.

INDIANA. Large flowering red; medium height. September.

JEAN HARLOW. Heavy blooming, large flowering yellow.

LEDA. Heliotrope pink, rolled petals. Long stems; grand cut flowers. October.

REVELLAR. Bright chestnut red. Fine for cutting.

ROSE PRINCESS. Salmon rose with a blush of gold at the base of the petals. Excellent either disbudded or in sprays. Long stiff stems. October.

TOLECROSS. Very large flowering rose-pink; tall and sturdy. October.

PINK LADY. Flowers of clear shade of pink. Medium height. Late September.
